Species Election

1) New claims 165-172 have been added.

Claims 126, 128, 144 and 160-164 have been amended.

Claims 126-128, 131, 144, 149, 150, 157 and 159-172 are pending.

2) This application contains newly added claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2, the species lack the same or corresponding special technical features as these species do not share significant common structural and/or antigenic elements. There is a search and/or examination burden for the various species identified below because these species require different field of search and/or different search queries:

Polypeptide species (claims 165, 166 and 168-172):

- (a) SEQ ID NO: 36 and SEQ ID NO: 43;
- (b) SEQ ID NO: 7;
- (c) SEQ ID NO: 3;
- (d) SEQ ID NO: 4;
- (e) SEQ ID NO: 5;
- (f) SEQ ID NO: 6 and
- (g) SEQ ID NO: 8.

Claims 126-128, 144, 149, 150, 157, 159-164 and 167 are generic.

The polypeptide species identified above do not share significant common structure and/or antigenic elements. Each species requires a separate sequence search.

3) Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4) The election of species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, Applicant must indicate which of these claims are readable on the elected species.

Should Applicant traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record, showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C § 103(a) of the other invention.
